WRAS Approval Number: 2305085

Approved Product

Range of wall mounted, two-hole, single outlet, fixed, combination tap assemblies (chrome plated brass), incorporating a manual diverter controlling the flow to the overhead or hand shower and a thermostatic cartridge controlling the temperature with dome operating member incorporating a manual override button. The spout outlet incorporates quarter turn ceramic disc headwork which diverts between the spout and shower outlets and the spout outlet incorporates a plastic aerator. The inlets incorporate a stainless-steel strainer and an approved check valve cartridge; however, the complete product has not been fully tested to demonstrate it provides backflow protection. Not supplied with shower hose or shower outlets. Maximum working pressure 10.0 bar.

Non-metallic materials and components comply with BS6920 at 65°C
